Ballondeco
create emotions

1. Connect the poles, match the colors
2. Fix poles with the screws

If needed use the spikes to fasten the stand into the ground floor OUTDOOR USE

When use inside, please add the felt at the bottom of the base plate.

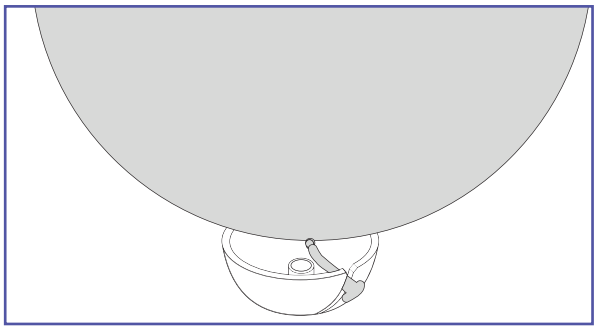

Balloon inflation

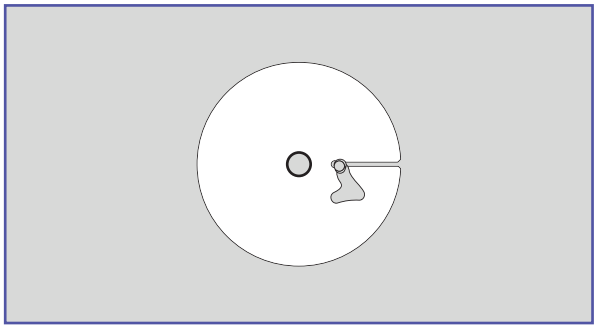

For instructions please read the user manual inside the inflators box

3. Inflate the balloons using the electrical balloon inflator
    3a. ensure that the throttle is set to max capacity
    3b. set timer to 7 seconds
    3c. place the balloon neck over the left valve
4. Press green button to start inflation, after first press, press again. The balloon is now fully inflated.
5. Tie a knot in the balloon neck. Ensure you stretch the balloon neck sufficiently so it will fit in the balloon holding cup.
6. Repeat three or six times according to your set.
